ZEROHALLIBURTON®

creative spirit

The original aluminum case we introduced to the world nearly seven decades ago has taken hold of people's imagination and stands as an icon of strength, security, endurance, and fashion. It blazed new territory for design, providing a unique, unmistakable presence that cannot be imitated.

Today, the same creative spirit that challenged the conventions of what business cases and luggage should look like—while raising the expected standards for their performance—has given rise to a new generation of inventive cases with unmatched performance.

We are expanding the boundaries of personal business and travel products by once again incorporating the most advanced materials available and creating solutions to satisfy your most challenging needs. A perfect combination of sound design principles and innovation that could have only come from ZERO Halliburton.

This effort is showcased in a variety of our new cases. The Carbon Fiber Collection (pages 18–19) presents what is quite possibly the most advanced attaché and travel products released since we introduced the first aluminum case in the late 1930s. You will also find EXPRESSIONS by ZERO Halliburton (pages 20–21 and shown at left), our new fashion line of handbags and attachés for women, Generation III (pages 14–16 and 28–29), available in leather and in our exclusive ballistic twill nylon, Digerati Computer Cases, (page 13), and of course The Original, classic ZERO Halliburton, the world's premier aluminum cases found throughout the catalog.

It is very true that no case in the world is like a ZERO Halliburton. Unequalled style. Unparalleled protection. At ZERO Halliburton, it's the standard by which we live.

BUSINESS

The business world is not a game for the faint of heart. It requires strength, tenacity, and endurance to get ahead. Of course, the power of a ZERO Halliburton case should never be underestimated. As an icon of success and status for nearly seven decades, ZH business cases have been commanding respect and instilling envy in business meetings throughout the world. And if your colleagues are touched with a hint of envy, more power to you.
